DR100 Helmets

All exhibitors are required to wear properly fastened protective headgear which meets or exceeds ASTM/SEI standards while mounted anywhere on the competition grounds. It must be properly fitted with harness secured. Any rider violating this rule at any time must immediately be prohibited from further riding until such headgear is properly in place.

DR101 Dress/Attire

The dress code for all Dressage tests and classes through Fourth Level is a short riding coat of conservative color, with tie, choker or stock tie, white or light-colored breeches or jodhpurs, boots or jodhpur boots, and protective headgear as defined in USEF DR120.5 and in compliance with USEF GR801. A cutaway coat (modified tailcoat) with short tails is permitted. Half chaps, gaiters and/or leggings are not allowed. Gloves of conservative color are recommended. Exception: Riders through First Level may wear half-chaps, gaiters or leggings in solid black or brown, without fringe, matching the color of their boots, and made of smooth leather or leather-like material.

DR102 Tack

1. IEL closely follows the USEF rules regarding tack for dressage at all levels. Please consult the USEF Dressage Rule book (USEF DR120) for rules about acceptable tack and bits. The rules regarding the use of double bridles in third and fourth level tests are also closely followed.
2. USEF-121.A Permitted Snaffles

(Bits pictured and described below are required for all tests and classes at Second Level and below and optional in Third and Fourth Level Tests.)

Snaffle bits must be smooth with a solid surface. Twisted and wire bits are prohibited. A mouthpiece with more than one rolling part is prohibited. Bits may be made with a rubber or plastic covering, but the bit may not be modified by adding latex or other material. Bits with mouthpieces made of synthetic material are permitted, provided that the contours of the bit conform to the contours of one of the bits pictured above. Flexible rubber or synthetic mouthpieces are permitted. A double jointed bit or snaffle with rotating mouthpiece may be shaped to allow tongue relief. The maximum height of the deviation is 30mm from the lower part of tongue side to the highest part of the deviation. The widest part of the deviation must be where the mouthpiece contacts the tongue and must have a minimum width of 30 mm. The mouthpiece of a jointed or unjointed snaffle may be shaped in a slight curve within the dimensions specified above, but other ported snaffles are prohibited. The mouth piece of a snaffle may have up to two joints. A bushing or coupling is permitted as the center link in a double jointed snaffle, however, the surface of the center piece must be solid with no moveable parts, except as pictured above. The center link may be tilted in a different orientation from the mouthpiece but must have rounded edges. The diameter of the snaffle mouthpiece must be minimum 10 mm diameter at rings or cheeks of the mouthpiece (exception: for ponies, the diameter may be less than 10 mm). Any bit combining a mouthpiece with any cheekpiece pictured above is permitted. The type of bit should not vary from those pictured above except where specified, and bits should be attached only as pictured in diagram. A cavesson, dropped, crossed or flash noseband is allowed when a snaffle bridle is used in warmup or competition, except as prohibited for some tests.
